

Capability Statement

BUSINESS SUMMARY:

Aztec Powerline Services, Inc. provides turnkey construction services as well as supplemental labor. Our versatility provides our customers with confidence in a safely completed project.

“Aztec is safe on purpose.”

APS prioritizes the health and safety of its employees, customers, contractors, and communities. A commitment to safety is essential in any organization, particularly in industries where there’s potential for accidents and injuries. Our emphasis on maintaining a safe work environment, and continuously improving safety practices and policies demonstrate a proactive approach to ensuring the well-being of everyone involved.

CAPABILITIES:

Provides distribution and transmission line crews for the building and/or replacement of electrical powerlines.

Provides crews for the construction of lattice towers.

Provides crews for the construction/maintenance of substations.

EXPERTISE:

The owners and upper management of Aztec Powerline Services, Inc. have 150 years of experience in the powerline industry. This experience provides careful assessment and flawless completion in the building and/or replacing transmission and distribution lines.

CUSTOMERS:

We have effectively completed jobs for Duke Energy, Dominion, Entergy, Georgia Power, Irby, LCRA, Southeast Power, and many other large transmission contractors.
